

Criteria III

3.2.1 – Institution has created an ecosystem for innovations and has initiatives for the creation and transfer of knowledge

The College has taken various initiatives for the creation and transfer of knowledge. To set up different training programs for students, the College delivers all necessary infrastructure. Students frequently use the Language Laboratory established by the Department of English to enhance their communication and personality development. The college hosts a Competitive Examination Cell that arranges resource person lectures and seminars for the competitive academy, encouraging students to get ready for and take part in competitive exams.

Prominent individuals from several professions are invited by the college to serve as resource persons for seminars, conferences, and workshops. A research cell at the college keeps an eye on and responds to problems about the state of research technique. It aims to encourage academic members to embark on research projects from different funding organizations and to foster a culture of research among them. To improve the research environment, Every Year College hosts an orientation course on how to prepare for the AVISHKAR Research Project for students. Students took part in the "AVISHKAR" competition and gave presentations on their study.

To broaden awareness and understanding, the college hosts a variety of lectures and seminars arranged by its Arts Association, Commerce Association, and Science Association. An IPR Cell and an Entrepreneurship Development Cell have been formed by the College. These cells foster specialized expertise in commerce, management, and information technology by hosting interactive sessions with successful entrepreneurs and seminars. For commerce students, the Rojgar AVM career Margdarshan Kendra collaborated to host the Tally GST online course. The institution has developed an ICT-based teaching and learning environment in response to global concerns. The college has put up a recording studio and transformed some traditional classrooms into smart classrooms to accomplish this goal. The faculty members can readily create their e-content by using these services. All the content is available for students on the YouTube platform.
